

- The first step of a project software design is make a scope of the project.

- Above, we have a project scope example

Project Scope Statement

Project Name	Order registration and delivery system for a pizzeria		
Project Sponsor	John Ries, CEO	Project Manager	Vitor Garcia
Date of Approval	06/30/2019	Last Updated	06/15/2019

1. Scope Description

Purpose of the project is to optimize the delivery and order register client in GoodPi Pizzeria located in São Paulo, Brazil

2. Project Deliverables

major project activities:

- project planning
- requirement specification
- software installation
- adjust software to client's needs
- training of pizzeria employers and couriers staff

deliverables:

- project schedule
- requirement specification document
- ready-to-use system
- training plan
- training manual

3. Acceptance Criteria

Successful move to new system solution over the weekend (10/27/19 – 10/28/19).

4. Constraints

Due to delivery commitments to customers the system transition must be performed during the weekend.

5. Assumptions

InventoryMaster consultants take over installation and configuration of software.
