• Now, you have to make a wireframe of the user interfaces of the system.

- You will make a draft of the user interfaces and the UI/UX will develop the user interface.
- You can make this user interfaces in Figma or Adobe XD
- Above, is the wireframe example of the home page and the products page in a computer view

• Above, is the wireframe in the mobile app.

• After this models, the design UI/UX will design the properly interface
